The members of the Supervisory Board, particularly the Chairman and Vice-Chairman, stayed in constant contact with the Company's Management Board, conducting consultations on various aspects of the Company's operations.

The Supervisory Board positively evaluates its work and the work of the Audit Committee in 2023. Furthermore, in the Supervisory Board's opinion, the activities conducted by the Supervisory Board and the Audit Committee in 2023 were adequate to the scale and complexity of the Company's operations.

Ad 3) Evaluation of the Company's Situation on a Consolidated Basis, Including an Assessment of the Internal Control System, Risk Management, Compliance, and Internal Audit Function, Encompassing All Significant Control Mechanisms, Especially Those Related to Financial Reporting and Operational Activities (Principle 2.11.3 DPSN2021 in Conjunction with Principle 3.9 DPSN2021).

▪ **Evaluation of the Company's Situation on a Consolidated Basis**

The Supervisory Board of the Company, in accordance with Principle 2.11.3 of DPSN2021, has assessed the situation of the Company on a consolidated basis. The Supervisory Board evaluates the Company's situation in the financial year 2023 as good.

This evaluation by the Supervisory Board is based on ongoing supervision of the Company's activities, conducted in accordance with the provisions of the Commercial Companies Code (KSH), the Company's Articles of Association, and the Regulations of the Supervisory Board of Caspar Asset Management S.A., through:

- Analyzing materials received from the Management Board, including the financial results achieved by the Company and the Capital Group;
- Obtaining information and detailed explanations from Management Board Members during Supervisory Board meetings;
- Activities of the Audit Committee;
- Activities of the statutory auditor who reviewed and audited the financial and accounting documentation and the financial statements prepared based on it.

The Supervisory Board's assessment results from ongoing discussions conducted by Supervisory Board Members with Members of the Company's Management Board and the team of auditors conducting the statutory audit of the Company's and the Capital Group's financial statements for 2023. These discussions took place primarily, but not exclusively, during Supervisory Board and Audit Committee meetings.

Additionally, the Supervisory Board, in forming this evaluation, considered the assessment of the Company's individual financial statements for the period from January 1, 2023, to December 31, 2023, the assessment of the consolidated financial statements of the Capital Group for the same period, the assessment of the Management Board's Report on the Company's and the Capital Group's activities for the same period, performed by both the Supervisory Board itself and the independent statutory auditor. Furthermore, the Supervisory Board took into account the assessment of the internal control systems included in the further part of this document.

Based on this, the Supervisory Board of the Company assesses that the Company was managed correctly and effectively in 2023, and the Management Board of the Company consistently and orderly pursued the set objectives in the past financial year.

Despite many difficulties and changes in the macroeconomic environment of the Company and the Capital Group in 2023 (the continuation of the armed conflict in Ukraine, persistently high inflation, high interest rates, the conflict in the Middle East) and the noticeable impact of the COVID-19 pandemic on many sectors of the economy in 2023, the Company managed to achieve a profit. Despite current difficulties in financial markets and investor sentiment, the Supervisory Board assesses that the situation of the Company and the Capital Group is stable.

- **Evaluation of the Internal Control System, Risk Management, Compliance, and Internal Audit Function, Encompassing All Significant Control Mechanisms, Especially Those Related to Financial Reporting and Operational Activities**

In accordance with the regulatory requirements governing the activities of brokerage houses and the sets of corporate governance principles adopted by the Company, in 2023 the Company operated:

- i) an internal control system,
- ii) a compliance system,
- iii) a risk management system, and
- iv) an internal audit system.

The Supervisory Board has evaluated these systems, especially regarding financial reporting and operational activities, for their adequacy and effectiveness in 2023 based on ongoing supervision of the Company, periodic information on the Company's activities, reports on the

functioning of the internal control system, the compliance system, the risk management system, and the internal audit system, provided directly by those preparing these reports, particularly based on:

- The Internal Audit Report for 2023 received from the Internal Auditor;
- The Report of the Compliance Officer on the activities of the Internal Control Team (the functioning of the compliance and internal control system) for 2023;
- The Risk Management Report for 2023 received from the Risk Officer;
- The Management Board's Report on the Company's and the Capital Group's activities for the period from January 1, 2023, to December 31, 2023, particularly the sections describing significant risk factors and threats related to the Company's and the Capital Group's activities, and the section describing the internal control system concerning the financial reporting process;
- The Company's financial statements for the period from January 1, 2023, to December 31, 2023, in which the Management Board described the risk management system functioning in the Company.

The reports received in this regard served the Supervisory Board particularly for supervising the implementation of the risk management strategy, in accordance with the provisions of § 52 paragraph 1 of the ZłK.

Ad i-ii) Internal Control System and Compliance System

In the opinion of the Supervisory Board, the internal control system implemented in the Company in 2023 effectively prevented instances of non-compliance with the Company's internal decisions and regulations, and the compliance system effectively prevented the Company from violating its legal obligations. As stated in the Compliance Officer's Report on the activities of the Internal Control Team for 2023, no significant violations occurred in 2023 that required informing the Management Board and the Supervisory Board.

Ad iii) Risk Management System

The Supervisory Board has determined that the Company operates a risk management system addressing the risks to which the Company is or may be exposed due to its business activities. The purpose of this system is to identify, measure or estimate, monitor, control, and mitigate the risks present or potentially present in the Company's operations, ensuring the correctness of the process of setting and achieving specific business objectives.

The risk management system implemented in the Company defines the principles for managing individual categories of risk identified as significant in the Company's operations, along with the associated procedures.

In the opinion of the Supervisory Board, both the Management Board and the Supervisory Board exercised due diligence in risk management throughout 2023. The Management Board approved all risk-related procedures, as well as the strategies and principles for identifying, measuring, monitoring, and controlling risk.

Both the Management Board and the Supervisory Board were involved in managing significant types of risk, identified according to the principles of risk identification, measurement, management, and monitoring.

Risk-related procedures were regularly reviewed to adjust to changes in the risk profile of the Company's operations and the economic environment in which the Company operates.

In 2023, the Company applied methods for identifying and measuring the risks associated with its activities that were appropriate to the nature, profile, scale, and complexity of those risks. The Company took into account the nature and scope of investment services and activities carried out in the course of its operations.

When managing various risk categories in 2023, the Company also considered risks related to sustainable development and broadly defined ESG (Environmental, Social, and Governance) factors.

In 2023, the Risk Officer was responsible for risk management tasks. During the reporting period, from January 1, 2023, to June 15, 2023, the Risk Officer reported directly to Ms. Hanna Kijanowska, Vice President of the Management Board, who was responsible for overseeing the risk management system until that date. Subsequently, due to changes in the composition of the Management Board and the allocation of competencies among its Members at the Extraordinary General Meeting of Shareholders (EGMS) on June 15, 2023, the Risk Officer reported to the entire collegial Management Board from June 16, 2023, to the end of the reporting period (December 31, 2023). This situation changed on March 21, 2024, when the Polish Financial Supervision Authority (KNF) issued its consent for Vice President Krzysztof Jeske, as referred to in Art. 102a para. 1 of the Act on Trading in Financial Instruments. Mr. Jeske was appointed as the Management Board Member responsible for overseeing the risk management system on June 15, 2023, effective June 16, 2023, subject to obtaining the KNF's consent. From that date, the risk management system has been overseen by the said Management Board Member.

Given the above, the Supervisory Board assesses that the Management Board, responsible for risk management, has established an adequate risk management system and implemented appropriate policies and procedures in this regard. The Company continuously analyzes changes in the legal, regulatory, microeconomic, and macroeconomic environments to assess risks associated with its operations. Risk management involves identifying and assessing risk areas across all aspects of the Company's activities.

The Supervisory Board believes that the key processes aimed at reducing the Company's exposure to the most significant risks, as defined by the Company, are functioning correctly and efficiently.

Ad iii) Internal Audit System

In the Company's operations, the functions of compliance oversight and internal audit are separated. The Management Board is responsible for designing, implementing, and operating the internal audit system, tailored to the size and risk profile associated with the Company's activities.

The tasks related to the Company's internal control system are performed by the Internal Auditor. These duties are outsourced to the external entity ProFuturity sp. z o.o. based in Warsaw, known for its professionalism, organizational and capital independence, and thorough knowledge of the Company's operational areas.

In 2023, the Internal Auditor's tasks included continuously examining and assessing the correctness and effectiveness of the systems, regulations, and internal procedures used by the Company in its brokerage activities. This entailed:

- 1) Establishing, implementing, and maintaining an annual internal audit plan approved by the Supervisory Board to examine and assess the adequacy and effectiveness of the systems, internal control mechanisms, and arrangements used by the Company;
- 2) Performing internal audits according to the schedule set out in the annual internal audit plan;
- 3) Developing conclusions from the internal audits, specifying related recommendations, and monitoring the implementation of these recommendations;
- 4) Providing all necessary assistance to the Supervisory Board in overseeing the performance of internal audit tasks;
- 5) Preparing written audit reports as needed, but at least annually, delivered simultaneously to the Management Board and the Supervisory Board, indicating appropriate corrective measures in case of any irregularities.

The annual report from the Internal Auditor for 2023 also included information on supervision and control over the brokerage services provided by the Company, including its promotional and advertising activities.

In conducting internal audits in 2023, the Internal Auditor analyzed internal documents, observed and analyzed the processes functioning within the Company, and assessed the performance of tasks by the employees of the Company's organizational units.

The Internal Auditor had access to all necessary information within the Company to conduct the internal audit. Upon the auditor's request, any employee was obliged to provide the requested information. The Internal Auditor could communicate directly with the Management Board, the Supervisory Board, and participate in their meetings if the topics discussed were related to the internal audit function.

Based on the above, the Supervisory Board assesses that the internal audit system implemented in the Company meets its objectives and is appropriate for the Company's size, structure, and the scale of its operations.

- **Assessment of the Internal Control, Risk Management, Compliance, and Internal Audit Systems in Financial Reporting and Operational Activities**

The Supervisory Board also assessed the internal control, risk management, compliance, and internal audit systems in terms of their adequacy and effectiveness in 2023, especially regarding financial reporting and operational activities.

Based on information from the Management Board, periodic reports, and information obtained during meetings with the audit firm authorized to audit the financial statements of the Company and the Capital Group, the Supervisory Board positively evaluates the Company's performance in accounting, financial reporting, their reliability, and auditing, as well as the identification and control of risks and the effectiveness of internal control systems.

The internal control and risk management systems related to financial reporting and operational activities aim to ensure that prepared financial reports are reliable, complete, and compliant with applicable regulations in both content and timeliness.

The Management Board is responsible for designing, implementing, and operating the internal control system suited to the Company's size and risk profile, including the functioning and effectiveness of control processes in financial statement preparation. The Management Board is also directly responsible for organizing the preparation of legally required financial statements.

The effectiveness of this system is ensured through:

- Separation of competencies related to economic decision-making and their recording.
- An established scope of financial reporting.
- Procedures for document flow and their approval, allowing for timely and complete recording of all accounting data.
- Ensuring appropriate information flow recorded in accounting books between designated persons from relevant organizational units and those involved in preparing financial statements.
- Use of appropriate software and IT systems to streamline internal reporting and financial data processing.
- Adopting suitable criteria for the selection and evaluation of employees involved in the reporting process, who possess the appropriate competencies, knowledge, and experience.
- Ensuring cooperation between the Company's auditor, its Supervisory Board, and the Audit Committee to facilitate the exchange of information regarding prepared statements.
- Division of tasks and responsibilities related to financial statement preparation among different internal units, enabling independent assessment and mutual verification of prepared documentation, with necessary collaboration.
- Ensuring proper communication and information flow between the companies in the Capital Group.
- An electronic banking access rights system preventing unauthorized access to the Company's financial resources.
- A system for verifying ongoing financial reports to reduce the risk of errors, allowing efficient verification and correction in the Company's books.
- Outsourcing continuous, comprehensive accounting services, including financial statement preparation for Group companies, to a professional external entity, MJ Biuro2 Sp. z o.o.
- Engaging a reputable audit firm for auditing/reviewing the Company's and the Capital Group's annual/interim financial statements, ensuring high-quality audit and review services.

The Management Board directly supervises the preparation of financial statements and periodic reports of the Company. Additionally, the Audit Committee was established to enhance the Supervisory Board's oversight effectiveness in financial reporting and financial review.

In 2023, the Audit Committee monitored, controlled, and assessed the entire financial reporting process and provided recommendations on the Supervisory Board's evaluation of the financial statements. The Audit Committee also took steps to minimize the risk of circumstances that

could prevent or delay the audit firm from performing the financial review tasks assigned by the companies.

Within its competences, the Supervisory Board evaluated the Management Board's reports on the Company's activities and the individual and consolidated financial statements regarding their consistency with the books, documents, and the factual state, issuing appropriate statements in this regard.

Summary

The Supervisory Board believes that the internal control system, risk management system, compliance oversight, and internal audit functions adopted by the Company adequately consider:

- a) The type and scope of the Company's operations, including brokerage activities;
- b) The technical and organizational solutions used in brokerage activities;
- c) The number of individuals performing brokerage-related activities;
- d) The number and categories of clients;
- e) The types of instruments involved in brokerage activities;
- f) The risks associated with the Company's activities, including brokerage, business model-related risks, and the systems used in the Company's operations.

Considering the above, the Supervisory Board believes that the Company has an internal control system, compliance oversight, internal audit system, and risk management system tailored to its needs and adequate to the Company's and its Capital Group's structure. These systems, in particular, support and adequately secure the efficient and reliable flow of financial information within the Company.

This Statement includes, among other things, information about the non-application of selected DPSN2021 principles along with justification.

A detailed description of the corporate governance principles applied by the Company is also included in the Management Board's Report on the Company's Activities for the period from January 1, 2023, to December 31, 2023.

During the financial year 2023, the Supervisory Board (including the Audit Committee) undertook the actions described in detail above in point 2 of this report. In the course of this activity, neither the Supervisory Board nor the Audit Committee obtained information indicating improper application of corporate governance principles by the Company or improper or erroneous fulfillment of information obligations concerning their application.

Therefore, in the opinion of the Supervisory Board, the Information published by the Company regarding the application of the DPSN2021 principles and the description of the corporate governance principles contained in the Management Board's Report on the Company's Activities for the year 2023 are consistent with the actual state, and the information obligations arising from the WSE Rules and the Regulation of the Minister of Finance dated March 19, 2018, on current and periodic information are fulfilled by the Company reliably and timely.

Moreover, throughout the financial year 2023, given the Company's status as an entity supervised by the Financial Supervision Authority (KNF), the Company adhered to the corporate governance principles set out in the collection named "Principles of Corporate Governance for Supervised Institutions" (ZŁK). In this regard, based on § 27 ZŁK, the Supervisory Board prepared a Report on the Functioning of the Corporate Governance Principles for the period from January 1, 2023, to December 31, 2023, which it submitted to the other bodies of the Company. The Company, through the publication of current and periodic reports, provided information on all significant events concerning the Company in a reliable and comprehensive manner in 2023.

The Supervisory Board confirms that the Company has published on its website the information and documents required by DPSN2021 and ZŁK.

The Supervisory Board believes that the information policy implemented by the Company is in compliance with applicable laws and ensures adequate access to all significant information about the Company and its activities.

Considering the above, the Supervisory Board of the Company positively assesses the manner in which the Company fulfilled all its information obligations in 2023, including the information obligations resulting from the application of corporate governance principles.

Ad 5) Evaluation of the Justification of Expenditures Incurred by the Company or the Group for Supporting Culture, Sports, Charitable Institutions, Media, Social Organizations, Trade Unions, etc. (principle 2.11.5 DPSN2021)

The Company does not engage in regular and organized sponsorship or charitable activities. Therefore, according to the Statement on the State of Application of the Principles Contained in the Code of Best Practice for WSE Listed Companies 2021 as of March 29, 2024, the Company declared that it does not apply principle 1.5 DPSN2021, which concerns disclosing at least once a year the expenditures incurred for activities in the aforementioned areas. In the justification for this stance, the Company indicated that its activities in this regard are sporadic and incidental, and the Company has not adopted any strategy or policy in this area.

Given the above, the Supervisory Board did not evaluate the justification of these expenditures.

Ad 6) Information on the Degree of Implementation of the Diversity Policy with Respect to the Management Board and Supervisory Board, Including the Achievement of the Goals Mentioned in Principle 2.1 (principle 2.11.6 DPSN2021)

Principle 2.1 DPSN2021 states that the Company should have a diversity policy for the management board and the supervisory board, adopted by the general meeting. The policy should define the goals and criteria of diversity in areas such as gender, field of education, specialist knowledge, age, and professional experience, as well as specify the timeframe and method for monitoring the achievement of these goals. To ensure diversity in terms of gender, the participation of the minority group in the body should be no less than 30%.

▪ **Implementation of the Diversity Policy with Respect to the Management Board**

In the financial year 2023, the requirements resulting from the above-mentioned DPSN2021 principle were met with respect to the Management Board, as the Company implemented a formalized document in the form of a diversity policy for the Management Board.

Based on the Supervisory Board Resolution of Caspar Asset Management S.A. dated October 10, 2018, the "Diversity Policy in the Composition of the Management Board of Caspar Asset Management S.A." was adopted, which is subject to periodic reviews by the Supervisory Board. This policy regulates the Company's strategy regarding the management of diversity in the composition of the Management Board.

The aim of the aforementioned Diversity Policy is to ensure the highest quality performance of the Management Board's tasks by selecting individuals with diverse knowledge, skills, attributes, and experience appropriate to their functions and responsibilities, which complement each other at the level of the entire Management Board.

According to the aforementioned Policy, the individual qualifications and characteristics of the members of the Management Board should complement each other to ensure an appropriate level of collegial management of the Company.

The diversity policy regarding the selection of members of the Management Board in the Company is implemented together with the "Policy on Verification and Selection of Persons for the Management Board and Supervisory Board and Key Employees of Caspar Asset Management S.A." during each evaluation of a candidate for the Management Board and the assessment of the suitability of both individual members and the Management Board as a whole.

In the opinion of the Supervisory Board, the composition of the Management Board in 2023 met the diversity requirements at a level of not less than 30% as per the aforementioned Diversity Policy, in terms of gender, field of education, specialist knowledge, age, and professional experience. Professional biographies of the Management Board members are available on the Company's website at the link:

<https://www.caspar.com.pl/relacje-inwestorskie/wladze>

▪ **Implementation of the Diversity Policy with Respect to the Supervisory Board**

In the financial year 2023, the requirements resulting from the above-mentioned DPSN2021 principle were not met with respect to the Supervisory Board, as the Company does not have a formalized document in the form of a diversity policy for the supervisory board. Moreover, the composition of the Supervisory Board in 2023 did not meet the gender diversity requirement of at least 30%.

Therefore, in the Statement on the State of Application of the Principles Contained in DPSN2021 dated March 29, 2024, the Company indicated that it does not apply principle 2.1 DPSN2021. The Statement on the State of Application of the Principles Contained in DPSN2021 dated March 29, 2024, is published on the Company's website at the link:

https://www.caspar.com.pl/wp-content/uploads/2024/03/GPW_dobre_praktyki_CASPAR-11.pdf

Despite the above, the composition of the Supervisory Board ensured sufficient diversity in terms of fields of education, specialist knowledge, age, and professional experience. Professional biographies of the Supervisory Board members are posted on the Company's website at the link:
